

FIRM RESEARCH CAPABILITIES

Our access to state-of-the-art independent research helps evaluate current and future portfolio positions.

There are research reports on more than 7,000 stocks, 10,000 mutual funds, and 7,300 variable annuity sub-accounts. We can provide you with hundreds of investment ideas, asset and sector allocations, earnings estimates, and overall portfolio guidance.

Additionally, the companies providing this research do not bring companies public, make markets in any of the stocks they analyze, or advise companies on mergers and acquisitions. Because these research firms are not broker/dealers and do not underwrite initial public offerings, you can feel confident that their analysis is not driven by any hidden agenda.
